

TEAM MATRIX

Twitter is an American microblogging and social networking service on which users post and interact with messages known as "tweets". Registered users can post, like, and retweet tweets, but unregistered users can only read them.

A user can perform various functions on twitter like –

1. **Profile** – User can create his profile on twitter in order to use it.
2. **Tweet** – User can upload a picture, thought, any information on twitter.
3. **Follow** – User can follow other users on Twitter so that they will be notified when they tweet as well as user can be followed by others.
4. **Trending** – In this section all the trending hashtags in the country are displayed.
5. **Like** – If user likes the tweet and show his affection towards it he can do that by liking the tweet.
6. **Retweet** – User can retweet other people tweet on his timeline.
7. **Mention** – User can mention other people (users) in his tweets.
8. **Moments** – User can create moments on twitter.
9. **Bookmark** – User can bookmark any tweet he likes.
10. **Lists** – User can create or subscribe to any list.
11. **Search** - User can search any other user with the help of this feature using his username
12. **Setting and Privacy** – User can change setting and privacy of his account with this feature.
13. **Notification** – User will receive notification when followed user uploads a new tweet.
14. **Message** – User can send message to any other user on twitter with the help of this feature.
